International Conference on Intelligent Computing and Smart Communication
ICSC 2019

20-21 April 2019, THDC-IHET, Tehri, India

[Call for Paper: Special Session](#)

Title of Special Session: “IoT Security and Data Analytics Challenges”

Introduction of the Session:

Internet of Things (IoT) that empowers a huge number of smart devices interconnected over a network. An extensive consideration from academia as well as industries requires protecting their information while transmitting from one end to another end. IoT application starts from data generation at the smart devices, data-streaming to the cloud for storage and analysis, and ending by feedback and data visualization. Many challenges can be addressed in each of the phases of the IoT life cycle in terms of cloud computing, Big Data models and data Analytics.

This session is an opportunity for authors working in the field of IoT and Data Analytics to share their new ideas, thoughts, and results.

ICSC – 2019

Owing to the responsibility in the field of research and technology, THDC-IHET and SoE, CUSAT, Kochi is organizing an International conference on Intelligent Computing and Smart Communication, (ICSC-2019) from 20-21 April 2019 at THDC-IHET, Tehri. The conference will witness several national, international delegates and researchers sharing their views and new ideas in the field of computing and communication. ICSC-2019 is expected to provide an opportunity for researchers to meet and discuss the latest solutions, scientific results and methods in solving intriguing problems in the fields of computing and communication along with real world applications. The conference program will include workshops, special sessions and tutorials, along with prominent keynote speakers and regular paper presentations in parallel tracks.

All the accepted and presented papers will be published in the **Algorithms for Intelligent Systems (AIS)**, a book series of Springer Nature.

International Conference on Intelligent Computing and Smart Communication
ICSC 2019

20-21 April 2019, THDC-IHET, Tehri, India

Topics of the Session

Authors are invited to submit their original, unpublished and quality research papers in the areas including but not limited to

- Security of IoT platforms
- IoT Applications
- Cloud, Fog, Grid and Mobile Computing
- IoT Application and Services
- Data Compression Algorithm
- Big Data Mining and Analytics
- IoT Mobility, localization, tracking & security

Organized by:

1. Dr. Mahtab Alam
Noida International University,
Noida, India
2. Dr. Neel Kamal Saini
Noida International University,
Noida, India
3. Dr. Nirmal Sharma
Noida International University,
Noida, India
4. Dr. Suryakant Yadav
International University,
Noida, India
